VetAminex – Product concept

- contains vitamins and micro- and microminerals which are necessary food ingredients for dogs and cats
- could be used for supplementation of food, especially when animal is fed with home-made diet
- Excellent source of vitamins and minerals for animals during recovery period, during pregnancy and lactation as well as for growing animals
- Contains calcium and phosphorus – when administering VetAminexu there is no need of administration of other calcium product

VetAminex – Product concept

- VetAminex should become golden standard in vitamins and minerals supplementation in dogs and cats
- Product from premium category – vitamins and minerals available only in veterinarians
- Benchmark to VMP product (Pfizer, at present Zoetis) – commonly known in Poland for many years but recently with very narrow distribution. VMP is considered by many vet as the best vitamins and minerals and supplement on the market, even though relatively high price

VetAminex – product characteristics

- Precisely selected **content**
- Perfect **tolerance** and high **palatability**
- Effective and comfortable **dosage** :
 - Cats – 1 capsule every other day
 - Puppies till 5 kg b.w. – 1 capsule every other day
 - Dogs - 1 capsule for 10 kg b.w. daily
- **Presentation** – soft Twist Off capsule

VetAminex – product characteristics

- Product contains vitamins and minerals in specific amounts which do not exceed the minimum daily requirements of dogs and cats (the sole product doesn't fulfil the requirements)
- Each animal when receiving the food (despite its type) always receives some amount of vitamins and minerals from food ingredients
