

# HYPOALLERGENIC INSECT

An unique combination of an exclusive protein source (*Hermetia illucens* insects) and a grain-free formula – to provide optimal support in reducing allergies and food intolerances in dogs

**MONOPROTEIN INSECT** – a novel source of animal protein (*Hermetia illucens larvae*) reduces the risk of allergies caused by common animal protein.

**OMEGA 3 & OMEGA 6 FA** – support skin function in cases of dermatosis and excessive hair loss.

**HYPOALLERGENIC/ELIMINATION DIET** – short list of ingredients and unique source of animal protein minimizes the risk of adverse food reaction.

**GRAIN FREE RECIPE** – potato and sweet potato as the only source of carbohydrates to reduce the risk of intolerance to cereal proteins.
