# STOMAFERIN ULTRA

COMPREHENSIVE, EFFECTIVE AND CONVENIENT SUPPORT  
FOR THE **THERAPY OF CHANGES IN THE ORAL MUCOSA  
AND GUMS** IN DOGS AND CATS.\*

## DUAL ACTION

Stomaferin Ultra offers two-way action, thanks to **its' unique combination of two active ingredients:** chlorhexidine and lactoferrin:

- The chlorhexidine – **reacts directly to the cause of the problem** – helps to reduce the formation of bacterial plaque on the teeth.
- The lactoferrin content – **reacts directly to the problem** – helps to reduce inflammation of the gums and oral mucosa.\*

## THE EFFECTIVENESS OF A GEL. CONVENIENT APPLICATION

- the gel formula adheres better than a liquid – it is more effective
- can be applied quietly and comfortably – keeping a pet from becoming stressed
- fully control of the outflow pressure of the gel
- it can be precisely applied to the oral mucosa when inserting the tip of applicator into the mouth
- can be used comfortably at the vet's or at home

## THE ANIMALS' SAFETY

- doesn't cause excess production of saliva in cats and dogs
- produced in the European Union
