ANTI-SEBORRHOEIC SHAMPOO

Anti-seborrheic shampoo

Purpose: Dermocosmetic shampoo for dogs and cats for intensive skin care and for skin prone to seborrhea.

Action: The ingredients contained in the product show cleansing the skin and hair, improving the condition of the hair, prevent excessive peeling of the skin, regulate sebaceous gland activity, soothe irritation.

Contained in the shampoo mild foaming agents, and appropriately selected substances improve the quality of coat. Fatty acids have regenerating and protective properties, allantoin has keratolytic and regenerating action stimulating self-cleaning of the skin by stimulation epidermis exfoliation. Panthenol enhances skin recovery.

Use: Wet hair with warm water, apply a small amount of shampoo on the hair, prepared foam, massage for approx. 5 min. Protect the eyes and ears from preparation; rinse carefully. Repeat if necessary.

Action of active substances

Zinc Gluconate	Antibacterial activity
Pyridoxine HCL	Vitamin B6, pyridoxine, pyridoxine hydrochloride and pyridoxal 5-phosphate function as hair conditioning agents and skin, regulates sebaceous glands, reducing sebum
Salicylid Acid	Salicylic acid removes dander and dandruff, reduces itching, has an antibacterial effect. Is considered antiseborrhoeic active and is used in dermatological disorders caused by an excessive amount of sebum produced. Excess makes the skin begins to peel, causing itching.
Piroctone Olamine I (oktopiroks)	Mix of two organic compounds, aminoethanol and 1-hydroxy-4-methyl-6- (2,4,4-trimethyl) pyridin-2-one. Exhibits anti-inflammatory activity and eliminate pathological microflora present in lesional dandruff; inhibits the growth of the fungus responsible for dandruff - Pityrosporum ovale (Malassezia furfur). The active substance in fighting the dandruff, normalizes and restores the balance of skin microflora, preventing the frequent recurrence of troublesome symptoms. Because of the broad spectrum of activity and documented, is used in anti-dandruff shampoos

Linum Usitatissimum Seed Oil	Linseed oil	Obtained by cold pressing of the seeds. Oil with an intense yellow color and an intense, tart flavor. Contains 10% saturated fatty acids, 58% alpha linolenic acid, 15% linoleic acid, 17% oleic acid. It is also rich in vitamin E used in the skin care and hair formed on the surface of the occlusive layer (film) which prevents excessive water evaporation from the surface (that is intermediate moisturizing), which conditions the skin and hair. The resulting film, smoothes the surface of the skin and hair.
Polysorbate 20	Non-ionic surfactant. Without danger to the environment - biodegradable.	As a solubilizer, which allows the introduction into an aqueous solution of substances insoluble or sparingly soluble in water, e.g perfumes, plant extracts, fatty materials.
Triethanolamine	pH adjuster	

Competition

- ✓ Sebolytic (Virbac) – very similar composition
- ✓ Dermatisan (Vet-Agro) – simpler composition (active sulfur only)
- ✓ Sebozero (ICF) – simpler composition with salicylic acid but without octopirox
