	<b>KALMVET ADVANCED ADMINISTRATION:</b> Cats and dogs up to 15 kg b.w. – 1 capsule daily. Dogs above 15 kg b.w. – 2 capsules daily.	<b>KALMVET ADMINISTRATION:</b> Cats and dogs up to 10 kg b.w. – 1 capsule daily. Dogs from 10 kg b.w. to 25 kg b.w. – 2 capsules daily. Dogs above 25 kg b.w. – 3 capsules daily.

# COMPOSITION COMPARISON - INGREDIENTS

## MODE OF ACTION OF ACTIVE SUBSTANCES

KALMVET ADVANCED	KALMVET
<p><b>Tryptophan</b> stimulates production of serotonin in the brain, enhances resistance of dogs and cats to stress and is responsible for well-being and mood control.</p>	
<p><b>Valeriana</b>, thanks to the content of valerenic acid and gamma-aminobutyric acid (GABA), takes part in reduction of anxiety and shows mild sedative effect. By binding to the exact receptor mechanism of this action is similar to benzodiazepine and the result of action is rapid.</p>	
<p><b>Rhodiola rosea</b> is a plant rich in <b>unique, natural, active substances supporting the body's homeostasis, enhancing resistance to stress, exhaustion and fatigue</b>. Salidroside are these active substances that are responsible for the long-lasting effects of Rhodiola rosea. Its extract improves non-specific resistance to stress by increasing serotonin concentration and limiting excessive secretion of corticotropin.</p>	<p><b>Chamomile extract</b> (Matricaria chamomilla) shows anxiolytic properties. Apigenin in chamomile extract binds to benzodiazepine receptors showing anxiolytic and mild sedative effect.</p>
<p><b>L-theanine</b> is a nonprotein amino acid which occurs in green tea. It helps to <b>reduce anxiety-related behaviour</b> as well as <b>improves cognitive functions</b>. It also has <b>neuroprotective properties</b> and shows a soothing effect which results in <b>relaxation and sedation</b>. It also helps to maintain the adequate concentration of GABA, serotonin and dopamine in brain.</p>	

# KALMVET ADVANCED – MAIN FEATURES

- **COMPOSITION AND DOSAGE ADAPTED TO ANIMALS REQUIRING ADMINISTRATION OF A STRONGER PREPARATION**
- **UNIQUE COMPOSITION**
- **SHORT-TERM EFFECT BEFORE STRESSFUL SITUATIONS AND LONG-TERM EFFECT IN CASE OF BEHAVIORAL PROBLEMS**
- **INGREDIENTS WITH EFFECTS CONFIRMED BY RESEARCH**
- **PRODUCT FROM VETEXPERT - NO. 1 IN THE VETS RECOMMENDATIONS (IN POLAND)**
